

HOME CARE INSTRUCTIONS

ONLY VIRGIN FULL CUTICLE HAIR

Remy human hair is collected from multiple donors, often with cuticles stripped or chemically processed/filled, leading to a shorter lifespan and potential damage. In contrast, virgin full cuticle hair, the holy grail of extensions, comes from a single donor with all cuticles intact and aligned. This ensures the hair remains naturally strong, shiny, and tangle-free.

Virgin hair is unprocessed and maintains its natural texture, providing a luxurious, long-lasting extension that blends seamlessly with bio hair. Only a handful of reputable companies in the world supply true virgin full cuticle hair, one of them being Salon Xtensions. Salon Xtensions makes all of its product lines from true virgin full cuticle hair, which can last over a year, with some extensions seeing lifespans of more than two years. Salon Xtensions sources all of our virgin raw hair directly from our own list of healthy donors, not from auctions or brokers.

THE RIGHT MINDSET

Congratulations on your new Salon Xtensions hair! We are thrilled that you have chosen the healthiest, most natural full cuticle hair extensions on the market. You have made a great choice for the health and wellness of your own hair. When properly maintained, not only can your SalonX hair last a long time, but they will also provide a natural barrier between your own hair and the harsh elements hair naturally encounters every day.

Most of our happy clients experience hair extension longevity of 1+ year and some still have their SalonX hair in for over 2 years. These same clients have also noticed that their own hair is thicker, fuller and healthier after wearing and properly maintaining their SalonX hair.

We are encouraged that these same results can be attained by you too. Check out these easy tips from our happy clients to get the most out of your new hair extensions.

IS WATER THAT IMPORTANT?

Yes! pH neutral water is crucial for hair health, preventing dryness, frizz, and dullness. For hair extensions, it preserves their smooth texture and shine, ensuring they blend seamlessly with your natural hair.

Filtered showerheads provide pH neutral water and remove harmful impurities like chlorine and heavy metals, protecting both your natural hair and extensions from damage.

This water also maintains the softness and manageability of hair extensions, preventing tangling and matting. With a filtered showerhead, you enjoy soft, smooth, and shiny extensions, enhancing their longevity and overall appearance. Remember to always rinse your hair extensions in cool or cold water to help close the cuticles. Always use a mask after washing.

Best Showerhead Filter: Jolie

THE RIGHT PRODUCTS

Using professional shampoos, conditioners, and masks is vital for maintaining hair health, preventing damage, and enhancing the longevity of hair extensions. Wash your hair only 1-2 times per week to avoid over-stripping natural oils.

Always condition and use a mask with each wash to keep hair hydrated, strong, and manageable. This routine helps maintain the integrity and shine of both natural hair and extensions. It also help to close and smooth out the cuticles. Do not mix brands, as their chemistries are not formulated to work together; mixing can cause adverse reactions and damage. Each brand has detailed instructions for optimal results—please follow and adhere to these instructions.

Recommended brands like K18, Amika, and Behave offer high-quality products that nourish and protect your hair, ensuring it remains soft, smooth, and vibrant between washes.

THE RIGHT EXTENSION BRUSH

Using the right extension brush with boar bristles is essential for maintaining the health and longevity of your hair extensions. The SalonX extension brush is specifically designed to not only detangle hair but also clean each strand by removing airborne particles and pollutants.

Brushing from bottom to top at least 5 times per day ensures proper daily maintenance between washes. This practice helps distribute natural oils, preventing tangles and keeping both your natural hair and extensions smooth and manageable.

The unique design of the SalonX brush ensures gentle care, reducing the risk of damage and maintaining the integrity of your hair extensions, ensuring they stay soft, clean, and vibrant.

MAINTENANCE APPOINTMENTS

Professional maintenance for Salon Xtensions involves regular move-ups every 6-8 weeks by a licensed stylist. This schedule ensures your hair extensions remain securely in place and look their best.

During each session, the stylist will adjust the extensions to accommodate natural hair growth, preventing tangling or matting. Our trained professionals use gentle, precise techniques to maintain the integrity of both the extensions and your natural hair.

Adhering to this maintenance routine not only preserves the longevity of your extensions but also promotes healthy hair growth. Trusting a licensed stylist ensures the highest level of care and expertise for your hair extensions.

AVOIDANCES

To maintain the quality and longevity of your Salon Xtensions, avoid certain products and environments. Steer clear of chlorine and salt water, as these can damage the hair and weaken the bonds.

Do not use purple or blue shampoos, as they can alter the color and texture of your extensions. Mixing brands of hair care products is also discouraged; each brand has unique formulations that can interact unpredictably.

Always consult with a licensed extensionist who has a deep understanding, knowledge, and experience with virgin full cuticle hair. Understanding hair chemistry at its fundamental level ensures your extensions stay vibrant and healthy, keeping them looking their best and extending their lifespan.
